DETAILED ACTION

Allowable Subject Matter

Claims 11 and 14-41 are allowed.

The following is an examiner's statement of reasons for allowance: MPEP

2144.04 clearly discloses that criticality of a limitation should be presented such that it does not fall within the routine expedients discussed within the section. Applicant sets forth the criticality of the relationship between the first and second elliptical regions. Thus after establishing criticality, despite the arguments in disagreement that criticality should be placed on the record, the prior art does not teach or suggest having a second elliptical region being a first major and minor axes plus a predetermined distance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
